24-hour emergency call out, annual service checks and a friendly office team are all part of the package to ensure our customers are happy with the services we provide.

04

PROVIDING INNOVATIVE SECURITY SOLUTIONS

CASE STUDY

THE CLIENT

An international food company that are currently the biggest manufacturer of non-perishable convenience products in Europe. They employ 1555 employees with a turnover in excess of £23 million per year and are based at 13 locations in and around Europe.

THE PROBLEM

Our client came to us with an existing intruder alarm and access control system that was fitted poorly by another company. They were experiencing a high level of false alarms on their system and a disappointing level of customer service from their supplier.

THE SOLUTION

A comprehensive Smart Alarm security system was upgraded and a VSS (CCTV) system was installed.

This helped with:

- Rebuilding confidence on using the system
- Security surveillance
- Health and safety compliance
- Remote monitoring and management
- A security upgrade that immediately saved much more than it cost

06

THE OUTCOME

The company's ICT Team Lead Support South & West Europe says: "Great company really efficient service from concept to implementation cannot fault ID security we used them to do a full CCTV install of 31 cameras and a full intruder alarm install at our food factory. They are coming back soon to renew and redesign our access control. Throughout the whole project we have had constant communication and help. They kept to all of our food laws and requirements. Highly recommended."

BENEFITS OF USING ID SECURITY SYSTEMS
